

### IN THE SPECIFICATION

Replace the paragraph beginning at column 4, line 53, with the following, in accord with the certificate of correction:

The elimination of the substituted silyl groups ( $R^2$  and  $R^3$ ) at the 2'- and 4"-positions of the compound of formula I can be carried out easily by treatment with an acid (e.g., formic acid) in an alcohol or with tetrabutyl ammoniumfluoride in tetrahydrofuran.
